

# Genuinely Natural Food. Nutritious Supplements. FREE HOME DELIVERY

**people or pets, good nutrition + exercise = good health**

For the past four years, CRITTER CLUB has run a hugely successful dog walking business in Sydney's Eastern Suburbs. At the same time, the owners Meredith Quinn and Lee Gough have been making premium natural pet care products under the name of alt(PETS). A lifetime of having their own critters and looking after those of others has taught them that the basis for good health (and thus, fewer vet visits) is exercise and good nutrition. They have researched the best food and supplements on the market, and now make them available to you.

This exceptional, concentrated food from New Zealand provides a **complete natural diet** with real, air-dried meat and added essential vitamins and minerals. The venison and lamb are ranch raised and **free of antibiotics and hormones** and the fish are straight out of New Zealand's clear blue waters. Only ingredients passed **fit for human consumption** are included and it contains no colours, preservatives, fillers, or grains (which are increasingly cited as a major cause of allergies).

## ZIWIPEAK AIR-DRIED

This formulation is based exactly on the Biologically Appropriate Raw Food diet developed by **internationally renowned Australian vet, Dr Ian Billinghurst**. The theory is rooted in the evolution of dogs and their feeding habits. As omnivores they respond best to a diet of raw foods, both animal and plant in origin. No cooked or processed foods and never a grain-based diet. BARF comes in a pack of frozen patties containing **meat, veggies, fruit, and supplements**. Simply defrost as needed and serve. Our dogs love it!

## BARF FROZEN PATTIES

## EAGLE PACK HOLISTIC

Pioneers of holistic-natural nutrition for dogs in the 1980s, Eagle Pack has developed a range of kibble and cans designed to address the **complete needs** of your dog, naturally. In addition to each ingredient being extensively researched to ensure strong health benefits, **prebiotics, probiotics, and digestive enzymes** have been introduced. Base ingredient choices include anchovy, chicken, duck, and lamb and rice.

## NATURAL BALANCE ORGANIC

The name says it all. The ingredients of Natural Balance kibble are **GMO free** and never sprayed with pesticides. Made with **fresh natural chicken**, free of hormones and antibiotics, as its base, this formula includes organic brown rice, oats, barley, potato, peas, flaxseed, carrots, spinach, cranberry, tomato, and parsley. It **does not contain soy, eggs, dairy products, sunflower oil, wheat, or corn**.

Just like people, many of our dogs tend to get a little stiff in their joints as they get older. We've sourced the three best supplements we can find: Jointguard, Petzflex Canine, and Sasha's Blend.

**Jointguard** provides the raw materials that are necessary for cartilage repair and maintenance. **Petzflex** is a New Zealand Green Lipped Mussel product that has been achieving very good results, while **Sasha's Blend** is an alternate marine based natural powder.

## JOINT HEALTH SUPPLEMENTS

We can't rave enough about this stuff. Since discovering it our dogs have been having it every day and they are all looking incredible. And **they love it!** The Wild Alaskan Salmon Oil is produced from wild salmon of the cold, deep Alaskan waters. It's **huge in omega-3** fatty acids and, importantly, gets the balance right between the threes and sixes. It eases dry itchy skin, helps boost a healthy immune system, fosters a bright and lustrous coat, and supports cardiovascular health.

## WILD ALASKAN SALMON OIL

## MEATY BONES & HEALTHY TREATS

Never to be eaten cooked, **bones** are an absolute necessity for strong, healthy teeth. We've sourced good, meaty lambs necks as well as chicken wings and necks, **all human grade** from quality suppliers. *Yummo*. For rewards, or just for a treat, there's the scrumptious Wild Alaskan **Crunchy Salmon Treats**, ZiwiPeak's Lamb, Beef or **Venison & Green Lipid Mussel**, and Critter Club's own dried liver or **roo chews**. *Good dog!*

## alt(PETS) COAT & SKIN CARE

Tired of putting chemical rubbish on our dogs, we sought to find a range of reliable, **natural grooming and care** products. Alas there was nothing, so we developed our own. That was six years ago and our **essential oil based** products are still going strong, even exporting to a healthy Japanese market. For beauty we offer a shampoo, conditioner, and face wash, ear drops for the necessary ear cleaning that every healthy dog must have, a spritz and a cream for itchy bits, and even a spray for fabrics that may have picked up a bit of a doggy smell.
